

## **COVID-19 PREVENTATIVE MEASURES IN PLACE**

As we are all in this pandemic together, we support and will play our role in following the preventative measures, to ensure the safety of our guests and to ensure Covid-19 is not introduced to our beautiful Dargle area.

In our efforts to increase our hygiene practices, we have made the following adjustments.

- Increased the number of hand sanitizers and placed them in more strategic places for all our staff members and guests to use throughout the day.
- Provided more hand soap in the cottages and rooms at the basins in the hope that guests will wash their hands more often, especially after being out and about on the Midlands Meander.
- Increased our cleaning techniques in the cottages, with additional spraying of disinfectant, after servicing and cleaning the rooms, on all well used areas such as door and cupboard handles, TV remotes, appliance handles; such as kettles, fridges, toasters, oven and microwave door handles and bathroom and kitchen taps, light switches etc.

You are welcome to contact us personally on our cell phones to ask any other questions you may have.

In health & preventative measures.
